

A Personal Guide to Self-Healing, Cancer and Love

It is human nature to ask Why did this happen to me? Though there may be medical explanations for illnesses, a scientific answer will not help us make sense of the pain and suffering that comes with these experiences. This book provides a fresh perspective on the challenges faced when we or someone we love is diagnosed with cancer. We often start by asking why it happened and what it means. Inevitably our biology, lifestyle habits and emotional wellbeing all play a part. For true healing to occur, we need to make changes on many levels. The author goes on to explore Energy Healing as a friendly booster for tired souls, equipping the reader with simple tools that can be used daily to facilitate their personal healing journey. The pages turn quickly, infused with love, courage and optimism. A portion of this books proceeds will be donated to cancer research.
