

## Conscious Mobility: Man and Dark Matter

Dark matter and dark energy are not vague and mysterious substances filling up space.

They are the basis of life, and are intricately interwoven with our physical existence. Thoughts and emotions are composed of dark energy, which transforms into dark matter thought-forms and emotion-forms that inhabit our world.

Even though dark matter makes up a large percentage of the total mass of the universe, it is invisible because it does not emit or reflect any currently known part of the electromagnetic spectrum. Auras and other psychic phenomena are also invisible to the physical eye. They must be seen with the third eye, an energy vortex in the brain which forms a channel that links the physical plane with the more rarefied planes of being. Conscious Mobility: Man and Dark Matter explores this relationship of mankind to dark energy and dark matter.
