

In an age where uncertainty rules the day, Dr. Rob Tenery has given us a book that explains how health care has evolved into a \$2.6 trillion enterprise. He does this with carefully researched histories and a series of challenging and thought-provoking commentaries on the most important issues of the day. Dr. Tenery's book focuses on a time when doctors and patients worked together to determine the best course of treatment—solutions now being ceded to large corporations and the federal government. He relates, as only a physician can, the challenges, fulfillment, and ethical dilemmas of caring for patients and making the best decisions for their health and well-being. Whether contemplating what doctors can do when nothing can be done, or thinking about the state of the medical profession, his insights are based on real-life experiences with his patients and colleagues. Dr. Tenery brings a perspective and a set of values gained from his father and grandfather, who, together with the author, represent over a century of caring for patients. This book gives you the opportunity to step into the shoes of a dedicated third-generation physician and to see the changing nature of health and medical care through his eyes. This physician of over thirty-seven years is sharing his collected writing for a better understanding of why medicine is a profession and not just another business.

HIV/AIDS in the Middle East and North Africa: The Costs of Inaction (Orientations in Development), A Practical Sanskrit Dictionary: With Transliteration, Accentuation and Etymological Analysis Throughout, Two Cardinals: John Henry Newman, Desire Joseph Mercier Edited by L. Gevers with the collaboration of B. Doyle (Bibliotheca Ephemeridum Theologicarum Lovaniensium), Planetary Transits & Relationships: Psychological Astrology, Iniciaciones de luz pleyadiana (Coleccion Mensajeros del Universo) (Spanish Edition), Into the Hand of a Woman,
