

Is God a Mathematician? and other musings

The mathematical nature of the universe has fascinated the scientists and philosophers of all ages. We still have not been able to decipher all the mathematics that goes into making this universe. Euclid said: The laws of nature are but the mathematical thoughts of God! Nobel Laureate physicist Paul Dirac says: If there is a God, he is a great mathematician! So is God a Mathematician? What is religion? Is it what the priests and theologians tell us? Is there more to it beyond the churches and synagogues? What is mid life crisis? Why does life suddenly appear to be meaningless in mid life? Even after achieving success in life, why do we feel a sense of emptiness and lack of meaning? Why do our achievements and ambitions do not excite us anymore? How is middle age related to this sense of pointlessness? What is the difference between knowledge and wisdom? Though there is a surfeit of knowledge in the modern world, there seems to be a palpable lack of wisdom. No wonder mankind is hurtling towards self annihilation in spite of being the most scientifically advanced civilization in the history of the planet! Knowledge clearly has failed. So can wisdom save us? Why have we totally lost the balance between work and life? Why are we in a situation where we ruin our health to make money and then spend that money to regain our health? Where is the life we have lost in living? If God created the universe, then who created the creator? What is prayer? Is it a kind of begging? What should be the right prayer? If ever you were haunted by any of these questions and want to explore them, then this book is for you.....
