

The Life of the Soul After Death

This book provides an electrifying and edifying account of the technical details surrounding the souls fascinating journey from heaven to a babys body in the womb of a pregnant woman. It unveils the manner in which the soul is connected to the physical body. It then offers a detailed discussion on how the soul disconnects itself from the physical body during the process of death; for its return journey to the spiritual realms; where it holds inherent citizenship. Following its return to the spiritual realms, the soul takes up residence on a spiritual abode, which corresponds to the magnitude of the moral and spirit merits or demerits the soul amassed while on earth. During the souls transient presence on this physical realm, it is expected to accumulate experiences by its own initiative; through its three cardinal agencies of mind, emotions and the physical body. The natural liberty for the soul to act with absolute discretion is known as freedom of choice; which is designed to enable the soul pursue only those courses of action, whose experiences it considers valid for its spiritual schooling on earth. The soul is also expected to judiciously exercise its freedom of choice, using its indispensable instruments of wisdom and love. Every course of action embraced by the soul generates corresponding consequences, which the soul must single-handedly assume. During the souls active life on this physical realm, the deeds and activities undertaken by the soul are faithfully and automatically recorded on a magnetic corpuscle. This recording is of such sophisticated detail that it is entirely impossible to miss even the minutest aspect of the souls totality of activities embarked upon while on earth. Therefore, this record constitutes a perfect audio-visual replica of the souls entire span of deeds, activities and experiences during its physical life. When the souls legitimate lifespan on earth comes to an end by way

of death, the soul is then irreversibly disconnected from the physical body, and quickly ascends to the spiritual realms. Also, during death, the fully documented account of the souls deeds, activities and earthly experiences form a mass of energy, which is infallibly and immutably attached to the soul. The soul departs from the planet earth to the spiritual realms, with this mass of energy bearing the full chronological and graphic account of its life on earth. The quality and beauty of the particular realm on which the soul resides after death, perfectly corresponds with the quality of the souls accompanying earthly account. Therefore, the soul is automatically pulled to the realm which has the same properties and qualities as the souls earthly account; attached to it with a marvellous degree of faithfulness; similar to the manner in which a dogs tail is attached to the body of the dog. If the content of the souls earthly account is wholesome and agreeable, it is automatically drawn for residence on the corresponding realm. Nonetheless, if the souls earthly account is unwholesome and disagreeable, it is equally drawn for residence on the corresponding realm. Therefore, this book also furnishes descriptive details of the quality of life available on each of the myriads of spiritual realms, where the soul may find itself residing after death. The book offers a riveting revelation on the means through which the soul can consciously choose the spiritual realm where it wishes to reside after death.
