

Will Bruder: Recent Works (Planet Architecture)

Will Bruder: Recent Works is the second in a series of monographs featuring the works of individual architects by PlanetArchitecture.com. Six projects are included on this CD-ROM. The Townsend Residence is a high expressive oasis which captures the beauty and serenity of the desert landscape. The Byrne Residence, inspired by the desert canyons, utilizes the play of light to dramatic spatial effects. The Deer Valley Rock Art Center minimizes its appearance on the site to maximize its effectiveness in orienting visitors to the exhibits. Here, reduction is used to heighten our awareness of materials, forms and functions of the Center. Riddell Advertising demonstrates the ability of architecture to make workplaces practical, yet enjoyable. The Phoenix Central Library embodies the spirit which inspires the mind to open up and expand. The Scottsdale Museum of Contemporary Art is truly an artistic expression in its own right. Its use of light, materials, and space creates an equally compelling place to exhibit contemporary art. The works together represent a variety of types and aesthetics which are unified by their observance of time and place, materials and forms, beauty and function. This CD-ROM features an intuitive, multi-referenced interface used to access the entire e-archive (electronic archive) of video interviews, photographs, writings, virtual reality panoramas, and drawings. The unique graphical interface takes full advantage of the interactive media and makes the self-guided explorations both user-friendly and enjoyable. This e-archive provides comprehensive documentation and virtual experiences unparalleled by any single medium. Over 160 photographs of interiors, exteriors, and details document these projects like never before. More than 60 virtual reality panoramas (allowing 360 degree panning) take you there virtually. A 30-minute video interview with Will

Bruder brings new insights in understanding his unique and innovative works. A comprehensive collection of drawings (plans, elevations, sections, and concept sketches), models, and renderings allow you to study and analyze each project. Guest Editor, Dana Hutt provides a 33 minute video overview of Bruders career. She also introduces each project in a narrated slide show format (49 minutes in all).
