

The Hidden Power and Other Papers Upon Mental Science

Inspiring and profound, Judge Thomas Troward's collection of essays is a classic of the New Thought movement of the early 1900s. It will be of great interest to all students of mystical, esoteric or occult philosophy. The guiding principle of new thought was the unity of spirit, and these essays will shed much light on the question of the relationship of our personal identity with the divine mind. This book is highly recommended. This edition has been carefully re-typeset from the original for readability and accuracy, it is not a facsimile reprint.
