

The Law of Karma and Reincarnation - How it Operates and Affects Your Life: Natural Justice

This book provides an edifying discourse spanning the entire breadth and full depth of the law of karma or cause and effect, with respect to its *raison detre*, its nature, mechanisms of operation, various forms of its manifestation, its dimensions of jurisdiction, its relationship with freedom of choice; and the secret of how to utilise karma as a means to sustainable happiness and success. It constitutes a comprehensive response to all the questions related to why things happen the way they do; from an individual to a global scale. The book is partitioned into part I and II. The first part supplies a holistic deliberation on the law of karma and reincarnation; while part II outlines the methods for pursuing and achieving eternal liberation of the soul from the law of karma and reincarnation in this lifetime. Freewill or freedom of choice is one of the most prominent inherent privileges with which humans are endowed. Life is characterised by virtually innumerable choices. It would be entirely impossible for anyone to espouse and exhaust all these choices. Thus, freewill is the birthright, ability and unrestricted privilege for humans to voluntarily embrace a particular set of choices, as opposed to numerous other available options. Saddled to freewill are conscience and reasoning, the vital tools that provide the moral and rational grounds for the exercise of freedom of choice. The four inborn fundamental means by which humans exercise their freewill comprise: thought, speech, emotion and action. Thus, when ever humans exercise their freedom of choice by means of a thought, speech, emotion or action, corresponding legitimate consequences are generated, which would ultimately be assumed by the person who has exercised that freedom of choice. Hence, the privilege to exercise freewill is naturally associated with the obligation to shoulder the consequences that stem from the exercise of that freewill.

This implies that humans are entirely responsible for the results that accrue from their exercise of freewill. The law of karma or the law of cause and effect is the natural, immutable, infallible and rigorous regulatory mechanism, which ensures that the consequences or fruits yielded by our exercise of freewill by means of a thought, speech, emotion or action, are delivered to us with the highest degree of faithfulness and infallibility. The rigour, immutability and infallibility of this impeccable law of karma warrants that the consequences stemming from a particular cause, are such that those causes and their consequences are reconciled in mathematical exactitude; such that this law can be interpreted in the light of Newtons third law of motion, which states that: For every action, there is an equal and opposite reaction. Or that: action and reaction are equal in magnitude but opposite in effect. The cardinal duty of karma is to faithfully deliver the results arising from the exercise of freewill. Thus, the law of karma is like the delivery agent of the universe, which faithfully delivers the goods you have ordered from this overwhelming infinite cosmic supermarket. Again, the law of karma can be likened to a fruit juice machine, which simply produces the juice of the fruit you have placed in the machine. If you place mango fruits in the fruit juice machine, you obtain mango juice. Karma just delivers the fruits of our choices, regardless of whether they are gainful or painful. Hence, karma is neither punishment nor reward; just a devoted servant of the universe, who ensures that our choices are respected to the highest possible degree. Hence, this book critically deliberates upon the manner in which the law of karma operates and how it affects our lives. It concludes with proven and universally validated practical methods for achieving liberation of the soul from the stringent sovereignty of karma and reincarnation in this lifetime.
