

The Destiny of the Nations

World problems are increasing in complexity as the population of the world increases, and as nations become inter-related and interdependent. It is important for the future of mankind that we understand and cooperate with the spiritual laws and forces at work within the interwoven structure of civilisation, so that the individual part - human and national - can be rightly related to the evolving whole. A nation is subject, as a man is, to the impact of energies emanating from solar and cosmic sources. These energies influence the nation as a whole through the mechanism of response equivalent to the Monad-soul-personality constitution of a man. Different nations are more receptive to some energies than to others; and all nations, subject to the evolution of national consciousness, have a destiny before them which is literally based on the qualities and the principles of the particular ray energy seeking expression through the national soul. In this book the ray energies affecting certain nations, world groupings and major cities are analysed in relation to meaning and purpose, and to the emergence of ideas appropriate to energy influences dominant at the end and at the beginning of an age. The world of humanity is shown as a state of becoming, guided and given opportunity by the spiritual Hierarchy - the inner government of the planet - from a stable state to Being. The understanding, acceptance and fulfillment of spiritual possibilities weaves the destinies of all peoples together into a synthesis, in which each contributes to the whole the unfoldment of individual potential. A recognition of the soul destiny of nations in the light of the teaching in this book, has a practicality today in our search for international adjustments. The ray qualities affecting the peoples of the world can be used intelligently to promote understanding and unity. We are given a glimpse in this book of the beauty of

energy synthesis when all component parts work together according to their own ray combination and the the glory of the One. The future will see right relationships, true communion, a sharing of all things ...and goodwill; we have also a picture of the future of humanity when all nations are united in complete understanding and the diversity of languages - symbolic of differing traditions, cultures, civilisations and points of view - will provide no barrier to right human relations. At the centre of each of these two pictures is to be found the Christ.
